

### Bravo's Summer House Stars' Injectable Reunion Preparation

**Manhattan:** Lauren Wirkus, Lindsay Hubbard, and Stephen McGee of Bravo's Summer House prepare for the show's Reunion Special with the help of NYC's top injector, Charis Wipfler, APRN-FNP, owner/operator of Grace Medical Aesthetics. Prior to the reunion premiering on April 3<sup>rd</sup>, 2018, the Bravo stars prepped with *Dysport and Restylane injections* to a refresh their look.

Lauren, Lindsay, and Stephen opted for Dysport injections to prevent the onset of fine lines and wrinkles. Dysport is a neurotoxin that relaxes wrinkles and is known for natural looking results that still allow for movement in the face, unlike the "frozen face" of Botox.

The girls, Lauren and Lindsay, take the preventative anti-aging movement a step further with Restylane, a dermal filler, for subtle enhancements under the eyes to correct dark circles and hollowing from natural volume loss. *"When I lose weight, I lose it in my face first, and Charis always restores the youthfulness I feel inside! Thank you to Grace Medical Aesthetics for keeping my face looking fresh."*, says Lauren.

Stephen McGee opts for Restylane Lyft injections in his chin and cheekbones to sharpen and improve his profile. Stephen shares on his Instagram story ([@stephenmcgee](https://www.instagram.com/stephenmcgee)), *"I got the chin I've always wanted!"*.
